

Breaking Down Your Gas Bill

The bottom line. It's where most eyes go when opening a gas bill. We want you to understand the different components of your natural gas bill.

Since the total amount due includes more than just your gas consumption, it makes sense to break down the bill into the different charges.

RATE PLAN is listed as variable, 6 bills fixed, 12 bills fixed or 24 bills fixed.

AGL (ATLANTA GAS LIGHT) BASE CHARGE represents the cost to deliver gas, pipeline maintenance and meter reading. Each marketer charges the same base charge.*

TO BE PAID BY DRAFT

WALTON'S CUSTOMER SERVICE CHARGE is \$5.75. Other Georgia natural gas providers charge nearly twice that amount, which is significant over 12 months.

THINGS TO CONSIDER:

- During colder months, the majority of your bill is gas consumption.
- Remember, when you receive a bill, you're actually paying for gas consumption one to three weeks prior to the billing date. Therefore, your bill may reflect different usage from your current usage, especially during billing periods with dramatically changing temperatures.
- Gas consumption is listed in CCFs, which equals the volume of 100 cubic feet of natural gas.

USAGE HISTORY is a 12-month consumption chart included to help track your usage patterns.

GAS CONSUMPTION is equal to the price per therm multiplied by the number of therms used. From the sample bill, the customer used 43 therms at a rate of \$0.529 per therm, which equals a current gas charge of \$22.75.

TAXES are mandatory and an identical rate among Georgia natural gas providers.

*Specific charges make up the AGL base charge – for details, visit atlantagaslight.com.

Pound Cake

Try with
a scoop of
your favorite
ice cream!

CAKE

- 3 sticks of real butter
- 8 oz. cream cheese
- 3 cups sugar
- 6 eggs
- 2 teaspoons vanilla
- pinch of salt
- ¼ teaspoon baking powder
- 2 cups all-purpose flour

CHOCOLATE ICING

- 1 stick butter
- 3 tablespoons Coca-Cola
- 3 tablespoons cocoa
- 1 teaspoon vanilla
- 1 box confectioner's sugar

Cream together butter, cream cheese and sugar. Add eggs and vanilla. Combine remaining ingredients in a separate bowl. Add flour mixture to sugar mixture. Bake at 325 degrees for one hour.

ICING: Bring butter, Coca-Cola, cocoa and vanilla to a boil. Add powdered sugar and beat until smooth.

Power Outages Don't Stop Gas Appliances

Inconvenient power outages can occur anytime. A natural gas connection can keep your home plugged into daily activities.

Gas Grill

Gas Oven

Gas Fireplace

• **COOKING** A natural gas stove or grill with a pilot light lets you enjoy a hot meal without electricity. Some oven models that are activated by a spark ignition require electricity.

• **HEAT** Stay warm during an outage with natural gas logs. A natural gas furnace, however, will not run during an outage. Furnace fans require electricity to distribute the heated air.

• **HOT WATER** Avoid cold showers with a natural gas water heater – you'll have continuous hot water no matter how long the lights are out.

• **BACKUP GENERATOR** A natural gas generator can run electric appliances like refrigerators and furnaces. The best part is that the generator automatically switches on when the power goes out.
