

GIVE YOUR HOME
EXTERIOR THE

gas light glow

ADD ELEGANCE

Unlike traditional flood lighting, natural gas lights don't cause harsh shadows. The typical natural gas outdoor light gives off an illumination equal to a 60-watt light bulb.

The soft, amber glow of a natural gas light is ideal for enhancing a front entrance, walkways, driveway, outdoor entertainment areas or landscaping. Gas lights come in a variety of styles, materials and options to fit preferences ranging from traditional to contemporary.

FUNCTIONAL BENEFITS

In addition to adding charm and character to a home or outdoor living space, the functionality of natural gas outdoor lights can't be beat! Among the benefits:

- **Reliable.** Because they operate without the assistance of electricity, gas lights continue to operate during an electrical outage – increasing the safety and security of your home.
- **Don't attract bugs.** Gas-powered lights give off an amber glow that isn't attractive to mosquitos.
- **Low maintenance.** There are no light bulbs to change. Plus, gas lights constructed of heavy cast aluminum and tempered glass will likely last for years with little to no maintenance.
- **Easy on and off.** Gas lights can be turned on and off from inside your home with a standard light switch or with timers.
- **Energy efficient.** Some models feature daylight-sensitive electric dimmer switches. These switches regulate the flow of natural gas during daylight hours and turn it up after dark – saving on fuel.

INSTALLATION

Natural gas outdoor lights should be installed by a qualified professional. To locate one near you, see Atlanta Gas Light's list of recommended installers at atlantagaslight.com/contact-us/find-contractor or call (800) 599-3770.

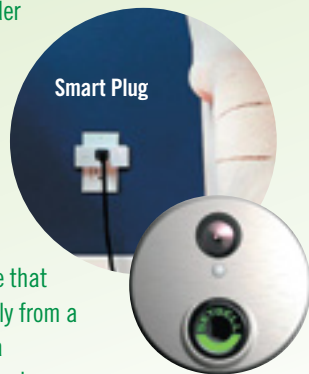

If you're already using natural gas to warm your water, keep the house heated or prepare food, it's time to think outside your windows. Investing in natural gas outdoor lights can add charm and value to the exterior of your Georgia home. Beyond aesthetics, low-maintenance gas lights also add a layer of protection when the sun goes down.

Get SMART for a carefree vacation

Vacation time is finally here! But so are the year's highest burglary rates!* Before you head out for your summer vacation, consider these "smart" products that let you monitor your home from anywhere, using your smartphone.

SMART PLUG

A smart plug turns any electronic device into one that can be controlled remotely from a mobile device or put on a schedule to create the illusion that someone's home. No more leaving a light on for a week, wasting electricity and money – and not fooling would-be thieves.

Smart Plug

Video Doorbell

VIDEO DOORBELL

Use your smartphone to see, hear and speak to anyone at the door whether you're in the kitchen or out of town.

KEYLESS DOOR LOCK

Control access to your home with your smartphone. No more leaving keys under the mat for dog walkers or neighbors who are looking after your place while you're out of town.

SMART THERMOSTAT

Most smart thermostats are built with vacations in mind, so you won't have to worry about wasting energy while you're away – or coming home to a hot house.

PET CAMERA

Worrying about your furry friend who's left behind at home can detract from the fun of a vacation. A pet camera can help you feed, play and interact with a pet while you're away.

KEEP IT SIMPLE

EMC Security, a subsidiary of Walton EMC, offers a variety of competitively-priced smart products that are compatible with your existing fire/security systems. Integrating smart lights, thermostats and locks with an existing system will simplify safety and security measures while you're away.

For product offerings, visit emcsecurity.com.

gas up the stove

7-Layer Corn Salad

lettuce, chopped (romaine preferred)
green pepper, diced
vidalia onion, diced
cooked corn, scraped from the cob
mayonnaise, layer to cover corn
cheddar cheese, shredded
bacon, crumbled

So simple and delicious!

Layer in your favorite casserole dish in the order listed above. Adjust quantities based on number of servings and ingredient preference. Make ahead or serve immediately.
